

Leave 2 lines of space between the top margin and the title
(Font size 10, single spacing)

Your Paper's Title Starts Here: Please Center use Arial 12 bold

First Author¹, Second Author² and Others³ (Arial 12)

¹Full address of first author, including city, country and email (Arial 10)

²Full address of second author, including city and country

³List all distinct addresses in the same way

Keywords: Arial 10; Leave 2 lines of space between keywords and abstract.

For the rest of the paper, please use Times New Roman 10, single spacing

Abstract. Abstract should be less than 100 words. The text area for your manuscript must be 13 cm wide and 19 cm high (margins for top, bottom, left and right are 5.5 cm, 5.2 cm, 4 cm and 4 cm, respectively). Do not place any text outside this area. Also leave 2 lines of space between sections.

Introduction

All papers must be in English. Please keep a second copy of your manuscript in your office (just in case anything gets lost in the email). Use italic for emphasizing a word or phrase. Do not use boldface typing or capital letters except for section headings (cf. remarks on section headings, below).

Organization of the Text (e.g. Experimental; Results; Discussion)

Section Headings. The section headings are in boldface capital and lowercase letters. Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph). These paragraphs should not be indented.

First line of the following paragraphs should be indented 5 mm.

Do not type page numbers!

Tables (refer with Table 1, Table 2, etc.) should be presented as part of the text, but in such a way as to avoid confusion with the text.

Table 1. *Equations defining increments in CRSS due to interfacial strengthening for aluminium alloys containing shearable precipitates*

Increment in CRSS for Interfacial Strengthening	Precipitate Form
$\Delta\tau = \frac{1.211 d_t}{t_t^2} \left(\frac{bf}{\Gamma}\right)^{1/2} \gamma_i^{3/2}$	{111}α plates

There should be one line of space above and below the table. A descriptive title *in italic* should be placed above each table. SI units should be used.

Figures (refer with: Fig.1, Fig.2, etc.) also should be presented as part of the text, leaving enough space so that the caption will not be confused with the text. The caption should be self-contained and placed *below or beside* the figure.

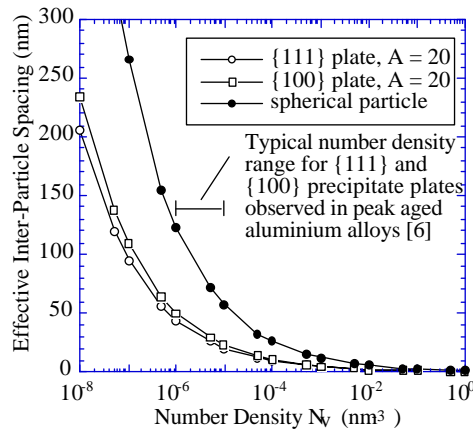

Fig. 1. Variation of effective inter-particle spacing with number density of particles...

Equations (refer with: Eq.1, Eq.2, etc.) should be indented 5 mm. There should be one line of space above the equation and one line of space below it before the text continues. The equations have to be numbered sequentially, and the number put in parentheses at the right-hand edge of the text.

$$c^2 = a^2 + b^2 \quad (1)$$

References are cited in the text just by square brackets [1]. Two or more references at a time may be put in one set of brackets [3,4]. The references are to be numbered in the order in which they are cited in the text and are to be listed at the end of the contribution under a heading *References*, see our example below.

Summary

Papers should be submitted electronically, either by an email or CD. Word processor should be Word 97 or newer version. Please also provide your phone number and e-mail address for rapid communication, if necessary. If you follow the foregoing, your paper will conform to the requirements of the publisher and facilitate a problem-free publication process.
