

PREFACE

The II International Conference “DEFORMATION PROCESSING AND STRUCTURE OF MATERIALS” was held in Belgrade from 26-28 May 2005. It was jointly organized by the Association of Metallurgical Engineers of SCG, Faculty of Technology and Metallurgy, University of Belgrade and Institute of Nuclear Science “Vinca”

The Conference is a biannual meeting of scientists, professionals and specialists working not only in the field of deformation processing of metals and alloys, but also those engaged in research related to the structure and property relationship and application of modern material.

This Special Issue of the Journal of Metallurgy presets some selected papers, contributed for the conference.

*Guest Editor
Prof Dr Endre Romhanji*
