

PREFACE

The III International Conference “DEFORMATION PROCESSING AND STRUCTURE OF MATERIALS” was held in Belgrade from 20-22 september 2007. It was jointly organized by the Association of Metallurgical Engineers of SCG, Faculty of Technology and Metallurgy, University of Belgrade, Institute of Nuclear Science “Vinca”, and Serbian Chemical Society.

The Conference is a biannual meeting of scientists, professionals and specialists working not only in the field of deformation processing of metals and alloys, but also those engaged in research related to the structure and property relationship and application of modern material.

This Special Issue of the Journal of Metallurgy presets some selected papers, contributed for the conference.
